

Golf Course Turf & Sports Turf Solutions

Microbial Soil Conditioners & Supplements

Reduces

Water Consumption

Fertilizer Usage

Soil Compaction

Improves

Root Growth

New Sod Stabilization

Nutrient Uptake in Plant Health

- ◆ Works on existing turf, reseeding sports fields and landscaping projects
- ◆ Improves water-holding capacity of the soil
- ◆ Increases cation exchange (CEC) reactions
- ◆ Buffers salts and toxins
- ◆ Breaks up clay/caliche and hard soils
- ◆ Retains water-soluble inorganic fertilizers
- ◆ Increases aeration of soil and improves drainage
- ◆ Promotes micronutrient uptake
- ◆ Promotes soil pathogen suppression
- ◆ Reduces other fertilizer requirements
